

Changes to State Project Notifications

For those Cities with both Plan Review and Inspection delegation agreements, the State has converted to an electronic plan review submittal system. This system will automatically direct the applicant to the jurisdiction with the Plan Review and Inspection agreement. It will not generate a "Project Jurisdiction Agreement" letter which has been traditionally mailed to jurisdiction. There is no change for those jurisdictions who have -Inspections Only- delegation agreements, the applicant still needs to apply to DOLI for plan review services.

Additionally, building officials having -Inspections Only- delegation agreements will receive electronic notification of a project when the information is entered into CCLD's database for plan review, and when the plan review is completed. They will not receive a project-by-project jurisdictional delegation letter either.
